GreenLeaf Microfinance

ISO/IEC 27001:2022 Gap Assessment | Scope & Authorization

Document ID: GLM-GRC-001
Version: 1.0
Assessment Period: October 12–14, 2026
Classification: Training Simulation | Fictional Client

1. Assessment Objective

Evaluate the fictional GreenLeaf Microfinance sandbox against selected ISO/IEC 27001:2022 information security management system (ISMS) requirements. Identify potential gaps in security governance, asset management, access controls, risk management, and documentation. Recommend corrective actions and prepare evidence for subsequent GRC project tasks.

2. Assets and Systems in Scope

- Node.js/Express demonstration application and login interface.
- Fictional borrower-information API ("/borrowers").
- Dockerfile, Docker Compose configuration, and local containers.
- Project GitHub repository and designated cloud demonstration deployment.
- Sample security policies, risk registers, and assessment documentation created for this project.

3. Assessment Boundaries

The assessment is limited to the GreenLeaf training sandbox and its fictional data. No real financial systems, customer information, production infrastructure, or third-party systems are included. Cloud-provider infrastructure is outside the assessment boundary.

4. Authorized Assessment Activities

Review project configurations, inspect application behavior, evaluate access-control design, identify potential security gaps, and document findings. Perform only non-destructive testing against the locally controlled sandbox or explicitly designated demonstration deployment.

5. Restrictions and Safeguards

No exploitation of external systems, denial-of-service testing, credential attacks, social engineering, or use of real borrower information. Do not publish passwords, access tokens, or confidential configuration values.

6. Deliverables

One-page assessment scope PDF, fictional authorization file ("AUTH.txt"), Dockerized demonstration application, public demonstration URL, and GitHub README with setup and deployment instructions.

7. Fictional Client Authorization

Client Representative: GreenLeaf Microfinance, Simulation Project Sponsor
Assessor: Student Project Team
Approval Status: Mock authorization for training purposes only
Signature: _____
Date: _____

This document is a fictional educational assessment scope. It does not represent authorization from an actual financial institution.
